Technical Portfolio: [GitHub App/Portfolio Repository](#)

ACADEMIC BACKGROUND

- Bachelor's Degree in Internet of Things and Cloud Computing at FMU – Faculdades Metropolitanas Unidas | Dec/2024;
- Technical High School in Information Technology (Computer Networks) Instituto Técnico de Barueri – Prof. Munir José | Dec/2010
- **Languages: Fluent English – GoFluent C1 Certification**

CERTIFICATIONS

- AZ-900 Microsoft Azure Fundamentals Certification - Certified on 02/19/2025;
- AI-900 Microsoft Azure AI Fundamentals Certification - Certified on 03/11/2025;
- AZ-104 Microsoft Azure Administrator Certification - In development.

QUALIFICATIONS AND SKILLS

- **SRE Engineering & Kubernetes:** Container orchestration with proficiency in Kubernetes (K8s) clusters, managing StatefulSets, Helm Charts, ingress controllers, and data persistence (StorageClasses/PV/PVC).
- **Infrastructure as Code (IaC):** Architecture and automated provisioning of scalable environments using Terraform (HCL) and Bicep for full Cloud (Azure) and On-premises provider automation.
- **AI-Driven Automation & Integration:** Development of disruptive solutions integrating LLMs via Python and PowerShell for complex task automation, predictive log analysis, and real-time monitoring dashboards.
- **Observability & Monitoring:** Implementation of complete monitoring stacks (Prometheus, Grafana, Loki/Promtail) for metric extraction and log visualization in distributed environments.
- **Advanced Systems Administration:** Deep knowledge of Linux Internals (RHEL, Oracle Linux, Debian) and Windows Server (AD, IIS, Failover Clustering), including performance tuning and system hardening.
- **Database & Middleware:** High-performance administration of PostgreSQL, MySQL, and SQL Server; management of WebSphere clusters and application servers.
- **Cloud Networking & Security:** Configuration of hybrid networks, Firewalls, Load Balancers, VPNs, and cloud infrastructure vulnerability analysis with a focus on offensive and defensive security.
- **Development & Interoperability:** Proficiency in Shell Scripting (Bash), PowerShell, Python, and developing low-latency communication systems (TCP/JSON-RPC) for hybrid system integration.

ABOUT ME

Systems Engineer and Infrastructure Specialist focused on enhancing the reliability and efficiency of mission-critical environments.

My expertise lies at the intersection of traditional systems administration (Linux/Windows) and modern cloud technologies, such as **Kubernetes and Terraform**. I take a hands-on, code-driven approach to SRE challenges, leveraging **Generative AI and Advanced Automation** to eliminate manual tasks and transform raw logs into operational intelligence.

I am driven by architecting solutions that are not just functional, but resilient, scalable, and automated by design.

To demonstrate my hands-on SRE expertise, I orchestrate a Kubernetes laboratory fully provisioned via Terraform and Helm. The ecosystem consolidates Infrastructure as Code (IaC), advanced data persistence (StatefulSets/PostgreSQL), and a full centralized observability stack (Prometheus, Grafana, Loki), reflecting the strict technical standards required for critical operations. Feel free to take a look at it in my [GitHub repository](#).

COURSES, CERTIFICATES & EXTRAS

- AWS Cloud Practitioner Essentials by Amazon - 40 Hours;
- AWS Week (AWS Cloud Practitioner Essentials) by Ka Solutions - 15 Hours;
- Cloud Fundamentals by 4Linux - 20 Hours;
- Linux Fundamentals by 4Linux - 20 Hours;
- Linux Essentials by 4Linux - 20 Hours;
- Introduction to Computer Networks by Fundação Bradesco - 15 Hours;
- Innovating with CSS by Fundação Bradesco - 26 Hours;
- HTML Basics by Fundação Bradesco - 11 Hours;
- Fundamentals of Programming Logic by Fundação Bradesco - 15 Hours;
- Fundamentals of Mobile Applications by Fundação Bradesco - 12 Hours;
- Ethics in Systems Development by Fundação Bradesco - 8 Hours;
- Database Administration by Fundação Bradesco - 15 Hours;
- ITIL Foundation 4 by NTT Data - 32 Hours;
- Openshift 1 - Containers and Kubernetes by RedHat - 24 Hours;
- Networks - Basic Concepts to Intranet Creation by Alura - 12 Hours.
- Certificate of English Language Proficiency C2 - Issued by GoFluent;
- Currently studying: Preparing to obtain the Microsoft Azure AZ-104 certification, as well as studying programming and programming logic.
- Certificates: [Certificados - Google Drive](#)
- My Professional Google Drive: [Shared - Google Drive](#)

PROFESSIONAL EXPERIENCE

- **Senior Cloud Analyst at Microsot Unified Resilience Team – AVANADE LTDA. (Oct/2025 - May/2026)**

In this senior role at **Avanade**, I led the execution of standardized cloud services within the **Microsoft Unified Support Resilience team**, focusing on infrastructure health, resilience, and business continuity. My role involves defining and monitoring critical resilience metrics, such as **RTO, RPO, MTTR, and MTBF**, and translating technical assessments into actionable recommendations that strengthen clients' cloud posture while minimizing operational risks. I collaborate with cross-functional teams, managing availability and delivery tracking to ensure consistent, high-quality outcomes aligned with strategic objectives. Operating within a scalable delivery framework, I help organizations enhance their readiness and resilience across complex cloud environments.

- **Cloud Analyst L2 at NTT DATA Brasil (Dec/2022 - Oct/2025):**

In this role, I work as a Cloud Infrastructure Analyst, managing cloud infrastructure with a primary focus on Microsoft Azure. My responsibilities include administration of Linux servers, PostgreSQL server management, Kubernetes cluster administration, WebSphere cluster administration, certificate management, and execution of maintenance windows related to the aforementioned activities, among various other daily tasks.

→ A recent example of my work in automation and AI-assisted development was creating a PowerShell script that parses TXT log files and generates an HTML dashboard.

The solution automatically extracts key metrics and error patterns, presenting them in a user-friendly web interface.

Leveraged AI coding tools during development to optimize the script and reduce delivery time. This significantly improved our monitoring process, giving the team faster and clearer insights from raw operational logs.

I also developed other similar tools to automate various repetitive tasks, such as performing snapshots, starting and stopping VMs, running scripts to check multiple VM-related information, and several other tools for overall infrastructure management.

- **Junior Analyst L2 at Inmetrics S/A (Jul/2022 – Dec/2022):**

Began working as a Level 2 (L2) support technician, performing general administration of Linux servers, including maintenance, patch application, and overall system support. Additionally, I started working with Oracle Linux, gaining exposure to database-related tasks and junior database analyst activities, such as executing scripts and performing routine database maintenance.

- Junior Analyst L1 at Inmetrics S/A (Aug/2021 – Jul/2022):

Similar to my previous experience, but at this stage I was significantly more advanced in Linux skills, preparing myself to take on a Level 2 (L2) support position.

- Junior NOC Analyst at Service Informática LTDA (Oct/2020 – Aug/2021):

Began working directly with Linux, gaining further knowledge of shell scripting, Linux navigation, and handling simple support tickets, as well as general Linux administration. Additionally, I provided support to TELECOM clients by maintaining Internet links, monitoring network infrastructure, and related tasks.

- Support Technician 1B at Sonda Procwork Informática LTDA (May/2019 – Apr/2020):

Re-entered the IT market in this role, working with IT outsourcing and handling basic support requests related to Linux infrastructure (including IT ticket management, meeting coordination, and general Level 1 support tasks).

- Bilingual Technical Support Consultant at Teleperformance SA (May/2017 - Jan/2019):

Provided support to Apple customers, offering assistance for all Apple devices (iPhone, iPad, iPod, Mac) as well as other Apple technologies.

- Owner at Skadi Informática, a basic maintenance company (Jun/2015 – Dec/2017):

Performed repairs on various types of devices, including minor electronics repairs and computer maintenance, both physical and logical (hardware and software). Through this experience, I was able to enhance and solidify my knowledge in hardware assembly and maintenance, as well as my understanding of operating systems in general, by facing a wide range of challenges in the field.

- English Teacher at Prepara Cursos (Aug/2014 – Feb/2015):

Taught English to children and teenagers. This opportunity allowed me to refine and enhance my English skills, providing me with a significant knowledge base and contributing greatly to my journey toward fluency in the English language.

- Call Center Operator at Editora Globo (Jan/2014 – Apr/2014):

Provided customer service to clients of Editora Globo, including subscribers of various magazines.

- Office Boy at Opergel Alimentos (Feb/2013 – Apr/2013):

Was responsible for delivering documents related to foreign trade and the regularization of business activities.

- Technical Support Analyst at Megatelecom & TV Alphaville (Sep/2011 – Aug/2012):

In this role, I provided technical support to customers of TV, Internet, and telephone services from the provider TV Alphaville/Megatelecom. As such, I faced several challenges related to network technology support and troubleshooting, including broadband modems and routers.

Consequently, I also provided occasional support for computers. This was my first experience working with and being introduced to Linux — although it was a Linux distribution with a graphical interface (I do not recall the specific distribution). Nonetheless, it helped me begin to familiarize myself with the Linux environment;

- Temporary Sales Associate at Decathlon Sports Store (Dec/2010 – Feb/2011).

Among my responsibilities as a sales associate, it is worth highlighting that maintaining the area organized was a constant challenge. I was also responsible for restocking items from the inventory, selling products related to wheel-based sports (such as bicycles, scooters, skateboards, etc.), performing and/or assisting with bicycle repairs in the workshop, among other tasks.
